At VintageJetSki.com you'll find everything you need to race, rebuild and restore your vintage jetski so you can squeeze the most out of it

Vintage JetSki Parts and Products - VintageJetSki.com

Turn the engine off if the engine is running and allow the engine to completely cool before you proceed, to avoid burning yourself. Locate the jet pins and the air valve adjustment screw. The jets are in plain sight around the frame of the carburetor and look like small gold pins. The air adjustment screw will be on the lower right or left side of the carburetor. Step 2. Open the owner's ...

Where To Download Small Engine Mikuni Carburetor Repair

Carburetors control the amount of air and fuel entering the engine to provide the correct mixture for combustion. To do this over a wide operating range, multiple fuel circuits are employed. At idle and low throttle openings the pilot, or slow fuel circuit, plays the most important role in fueling. As the throttle is opened the carburetor transitions to the needle jet and jet needle circuit ...

Pilot Screw Adjustment - Cyclepedia Repair Library

(Updated & Added 2/22/21) Most small engine (and automotive engine) rebuild machine shops regrind valves to OEM specs (or install new valves), which is usually 45° for the valves, and 46° for the seats. This is what I do for plain, stock engines. But whenever I build an engine for more power, I regrind the intake valve face at a 30° angle and undercut the head for less shrouding of the ...

Introducing the ADV 190R When it comes to performance, looks and all out fun the ADV 190 can't be beat! Featuring pro-style suspension and the monster 190cc electric start, five speed four stroke engine, the ADV 190R is truly in a class of its own. When it's time to push the limits, stunting at the track or busting a berm the dual sport chassis and aggressive tires are ready for the task!

ADV 190R 5 SPEED, E-Start - GoKarts USA

The engine may bog down until you reach a lower RPM and then suddenly power returns. Difficulty Starting. Spark plugs are clean - No residue. Insulator may be white. Runs better at higher altitudes - AFR becomes normalized due to reduced atmospheric pressure allowing fuel into the venturi easier. Backfires - Popping on deceleration for a lean idle circuit or backfires in general. Runs on choke ...
